## Introduction

The statistics contained in this publication are the results of three National Surveys conducted by Canada Mortgage and Housing Corporation.

## Survey Coverage

The Starts and Completions Survey is carried out monthly in urban areas with populations in excess of 10,000 as defined by the 1996 Census. Centres with populations below 10,000 are enumerated on a sample basis four times a year, at the end of March, June, September and December.

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, a report is also made as to whether or not a unit has been sold or rented. The dwellings are then enumerated each month until such time as absorption occurs.

The Rental Market Survey is carried out on an annual basis in October in urban areas with populations in excess of 10,000 in row and apartment structures containing at least three rental dwelling units.

## Concepts and Definitions

A “**start**” for the purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

A “**completion**” is defined as the stage at which all proposed construction work on a building has been performed, although under some circumstances a building may be counted as completed where up to 10 percent of the proposed work remains to be done.

For multiple-dwelling structures, the definition of a Start or a Completion applies to the structure rather than to the individual dwelling units therein.

The number of units “**under construction**” as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported at start.

**Only new self-contained dwelling units are enumerated in the Starts and Completions Survey**, such units being designed for non-transient and year-round occupancy.

## Introduction

Les statistiques contenues dans la présente publication proviennent de trois relevés d'envergure nationale faits par la Société canadienne d'hypothèques et de logement.

## Étendue des enquêtes

Le relevé des mises en chantier et des achèvements est fait mensuellement dans les centres urbains de 10 000 habitants et plus, déterminés par le recensement de 1996. Dans les collectivités de moins de 10 000 âmes, le relevé est fait par échantillonnage quatre fois l'an, soit à la fin des mois de mars, juin, septembre et décembre.

Le relevé des logements écoulés sur le marché est fait en même temps que le précédent dans les centres urbains de 50 000 habitants et plus. Lorsqu'on signale l'achèvement d'un immeuble, on indique aussi les logements vendus ou loués. L'immeuble est, par la suite, recensé chaque mois jusqu'à ce que tous ses logements soient écoulés sur le marché.

L'enquête sur les logements locatifs a lieu une fois par an, en octobre, dans les centres urbains de 10 000 habitants et plus; elle porte sur les ensembles de logements en bande et les immeubles d'appartements comprenant au moins 3 logements locatifs.

## Définitions

Dans le relevé des mises en chantier et des achèvements, **“mise en chantier” (ou logement mis en chantier)** désigne le début des travaux de construction, d'ordinaire après la mise en place de la semelle en béton, ou à un stade équivalent lorsque le bâtiment n'a pas de sous-sol.

**“Achèvement” (ou logement achevé)** désigne le stade où tous les travaux de construction sont terminés; dans certaines circonstances, on peut considérer un bâtiment comme achevé s'il ne reste que 10 p. 100 des travaux prévus à exécuter.

Pour les logements collectifs, la définition de mise en chantier ou d'achèvement s'applique à l'immeuble tout entier plutôt qu'aux logements individuels qu'il contient.

Le nombre des logements **“en construction”** à la fin d'une période comporte certains redressements rendus nécessaires pour diverses raisons. Par exemple, après la mise en chantier d'un logement, la construction peut cesser, ou un bâtiment peut contenir à l'achèvement plus ou moins de logements que le nombre signalé au moment de la mise en chantier.

**Seuls les logements autonomes sont dénombrés dans le relevé des mises en chantier et des achèvements**, qui ne porte que sur les logements neufs destinés à l'occupation permanente.

**Conversions and/or alterations** within an existing structure are excluded from the surveys as are **seasonal dwellings**, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and **hostel accommodation**, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

**Mobile Homes** are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory, then moved to a foundation before it is occupied.

**Trailers** or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the surveys.

A **“dwelling unit”** is defined as a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else’s living quarters.

**The definitions of types of dwellings, used in the Surveys, are in accordance with those in the Census.**

A **“single-detached”** dwelling is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure.

A **“semi-detached”** dwelling is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **“row”** dwelling is a ground-oriented dwelling attached to two or more similar units so that the resulting row structure contains three or more units.

An **“apartment and other”** dwelling includes all dwellings other than those described above, including structures commonly referred to as duplexes, triplexes, double duplexes and row duplexes.

**“Seasonally Adjusted at Annual Rate”** is the result of adjusting monthly or quarterly statistics to provide an indication of the annual total which would be achieved if activity in all other months or quarters were at the same level of performance relative to past seasonal patterns.

**Les transformations ou les modifications** effectuées dans un bâtiment existant sont exclues des relevés, ainsi que **les habitations saisonnières** (chalets d'été, de chasse, de ski, roulottes, maisons flottantes) et **les logements de type foyer** (hôpitaux, centres d'hébergement, institutions pénitentiaires, couvents, monastères, camp militaires et industriels et autres habitations collectives comme les hôtels, les clubs et les maisons de pension).

Les **maisons mobiles** sont incluses dans les relevés. Une maison mobile est un type de logement entièrement assemblé à l'usine, puis installé sur des fondations permanentes avant l'occupation.

Les **roulottes** ou tout autre type de logement démontable, sans fondations permanentes, sont exclus des relevés.

Le terme **“logement”** désigne tout local d'habitation distinct et complet, muni d'une entrée privée donnant directement sur l'extérieur ou dans un vestibule, un corridor ou un escalier communs à l'intérieur de l'immeuble. On doit pouvoir utiliser cette entrée sans traverser un autre logement.

**Les types de logements utilisés dans les relevés sont définis de la même manière que pour le recensement.**

Une **“maison individuelle”** est un bâtiment comprenant un seul logement, complètement séparé, sur tous ses côtés, de toute autre habitation ou construction.

**“Maison jumelée”** désigne l'un ou l'autre des deux logements situés côte à côte dans un bâtiment contigu à aucune autre construction, et séparés l'un de l'autre par un mur commun ou mitoyen du sol jusqu'au toit.

Une **“maison en bande”** est un logement avec entrée privée joint à au moins deux habitations semblables, de manière à former une bande ou rangée de trois logements contigus ou plus.

La catégorie **“appartement et autre”** englobe tous les logements qui n'entrent pas dans les catégories ci-dessus, y compris les constructions communément appelées duplex, triples, duplex jumelés et duplex en bande.

Les **“données désaisonnalisées annualisées”** ou **“taux annuels désaisonnalisés”** sont le résultat d'une correction des statistiques mensuelles ou trimestrielles faite pour indiquer le total annuel qui serait atteint, compte tenu des caractéristiques saisonnières antérieures, si l'activité était la même au cours des autres mois ou trimestres.

**Definitions of Census Areas referred to in this Publication are as follows:**

1996 Census - A **Census Metropolitan Area (CMA)** is the main labour market area of an urbanized core or a continuous built-up area having 100,000 or more population. Census Metropolitan Areas contain whole municipalities or Census Subdivisions.

It comprises:

1. Municipalities completely or partly inside the continuous built-up area, and
2. other municipalities, if
  - (a) at least 50% of the employed labour force living in the municipality works in the urbanized core, or
  - (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

1996 Census - **Census Agglomerations (CA)** are defined in the same manner as CMA's except that the urbanized core population is between 10,000 and 99,999.

**Voici la définition des unités géostatistiques de recensement utilisées dans la présente publication.**

**Région métropolitaine de recensement (RMR)** - recensement de 1996: principal marché du travail d'un noyau urbanisé ou d'une zone bâtie en continu comptant 100 000 âmes ou plus. La RMR englobe des municipalités ou des subdivisions de recensement entières.

Elle se compose:

1. des municipalités qui se trouvent en totalité ou en partie à l'intérieur de la zone bâtie en continu et
2. d'autres municipalités pourvu qu'elles remplissent une des conditions suivantes:
  - (a) au moins 50% de la population active occupée vivant dans la municipalité travaille dans le noyau urbanisé, ou
  - (b) au moins 25% de la population active occupée qui travaille dans la municipalité habite le noyau urbanisé.

**Agglomération de recensement (AR)** - recensement de 1996: a la même définition que la RMR sauf que la population de son noyau urbanisé se situe entre 10 000 et 99 999 habitants.

## HOUSING STARTS UP IN APRIL

The seasonally adjusted annual rate\* of housing starts in Canada rose 2.9 per cent in April to 162,000 units compared with 157,400 units in March.

April's urban multiple starts were up 14.7 per cent to an annual rate of 65,500 units compared with 57,100 in March, due to more starts in the Atlantic, Prairies, and British Columbia. Urban single starts fell 5.8 per cent to an annual rate of 74,300 from 78,900 units the previous month.

Housing starts in rural areas were estimated at an annual rate of 22,200 units.

## HAUSSE DES MISES EN CHANTIER EN AVRIL

Le nombre de mises en chantier au pays s'est accru de 2,9 % pour s'établir à 162 000 logements en données désaisonnalisées annualisées\* en avril, comparativement aux 157 400 logements dénombrés en mars.

En avril, les mises en chantier de logements collectifs en milieu urbain ont augmenté de 14,7 % pour s'établir à un taux annuel de 65 500 unités comparativement aux 57 100 unités en mars. Cette progression est attribuable au surcroît d'activité dans l'Atlantique, les Prairies et la Colombie-Britannique. Dans les centres urbains, le nombre de nouveaux logements individuels s'est replié à un taux annuel de 74 300 unités, soit un recul de 5,8 % par rapport aux 78 900 unités du mois précédent.

Dans les régions rurales, on estime que le nombre de mises en chantier a atteint 22 200 unités au taux annuel.

## Relevé des logements écoulés sur le marché

limites supérieures des quintiles de prix (1) (2) des maisons individuelles et jumelées nouvellement achevées mais non écoulées par région métropolitaine, grand centre urbain et agglomération urbaine de recensement  
avril 2001

(1) Lorsque le nombre de logement est trop petit, les chiffres ne sont pas indiqués individuellement pour les marchés concernés mais englobés dans le total.

(2) Les données concernent les logements de propriétaires-occupants et en copropriété.

(1) Because of the small number of units involved, certain markets are not shown individually but are included in the totals.

(2) Data refers to Homeownership and Condominium dwelling units.

(1) Lorsque le nombre de logement est trop petit, les chiffres ne sont pas indiqués individuellement pour les marchés concernés mais englobés dans le total.

(2) Les données concernent les logements de propriétaires-occupants et en copropriété.

## Introduction

The statistics contained in this publication are the results of three National Surveys conducted by Canada Mortgage and Housing Corporation.

## Survey Coverage

The Starts and Completions Survey is carried out monthly in urban areas with populations in excess of 10,000 as defined by the 1996 Census. Centres with populations below 10,000 are enumerated on a sample basis four times a year, at the end of March, June, September and December.

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, a report is also made as to whether or not a unit has been sold or rented. The dwellings are then enumerated each month until such time as absorption occurs.

The Rental Market Survey is carried out on an annual basis in October in urban areas with populations in excess of 10,000 in row and apartment structures containing at least three rental dwelling units.

## Concepts and Definitions

A **“start”** for the purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

A **“completion”** is defined as the stage at which all proposed construction work on a building has been performed, although under some circumstances a building may be counted as completed where up to 10 percent of the proposed work remains to be done.

For multiple-dwelling structures, the definition of a Start or a Completion applies to the structure rather than to the individual dwelling units therein.

The number of units **“under construction”** as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported at start.

**Only new self-contained dwelling units are enumerated in the Starts and Completions Survey**, such units being designed for non-transient and year-round occupancy.

## Introduction

Les statistiques contenues dans la présente publication proviennent de trois relevés d'envergure nationale faits par la Société canadienne d'hypothèques et de logement.

## Étendue des enquêtes

Le relevé des mises en chantier et des achèvements est fait mensuellement dans les centres urbains de 10 000 habitants et plus, déterminés par le recensement de 1996. Dans les collectivités de moins de 10 000 âmes, le relevé est fait par échantillonnage quatre fois l'an, soit à la fin des mois de mars, juin, septembre et décembre.

Le relevé des logements écoulés sur le marché est fait en même temps que le précédent dans les centres urbains de 50 000 habitants et plus. Lorsqu'on signale l'achèvement d'un immeuble, on indique aussi les logements vendus ou loués. L'immeuble est, par la suite, recensé chaque mois jusqu'à ce que tous ses logements soient écoulés sur le marché.

L'enquête sur les logements locatifs a lieu une fois par an, en octobre, dans les centres urbains de 10 000 habitants et plus; elle porte sur les ensembles de logements en bande et les immeubles d'appartements comprenant au moins 3 logements locatifs.

## Définitions

Dans le relevé des mises en chantier et des achèvements, **“mise en chantier” (ou logement mis en chantier)** désigne le début des travaux de construction, d'ordinaire après la mise en place de la semelle en béton, ou à un stade équivalent lorsque le bâtiment n'a pas de sous-sol.

**“Achèvement” (ou logement achevé)** désigne le stade où tous les travaux de construction sont terminés; dans certaines circonstances, on peut considérer un bâtiment comme achevé s'il ne reste que 10 p. 100 des travaux prévus à exécuter.

Pour les logements collectifs, la définition de mise en chantier ou d'achèvement s'applique à l'immeuble tout entier plutôt qu'aux logements individuels qu'il contient.

Le nombre des logements **“en construction”** à la fin d'une période comporte certains redressements rendus nécessaires pour diverses raisons. Par exemple, après la mise en chantier d'un logement, la construction peut cesser, ou un bâtiment peut contenir à l'achèvement plus ou moins de logements que le nombre signalé au moment de la mise en chantier.

**Seuls les logements autonomes sont dénombrés dans le relevé des mises en chantier et des achèvements**, qui ne porte que sur les logements neufs destinés à l'occupation permanente.

**Conversions and/or alterations** within an existing structure are excluded from the surveys as are **seasonal dwellings**, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and **hostel accommodation**, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

**Mobile Homes** are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory, then moved to a foundation before it is occupied.

**Trailers** or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the surveys.

A **“dwelling unit”** is defined as a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else’s living quarters.

**The definitions of types of dwellings, used in the Surveys, are in accordance with those in the Census.**

A **“single-detached”** dwelling is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure.

A **“semi-detached”** dwelling is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **“row”** dwelling is a ground-oriented dwelling attached to two or more similar units so that the resulting row structure contains three or more units.

An **“apartment and other”** dwelling includes all dwellings other than those described above, including structures commonly referred to as duplexes, triplexes, double duplexes and row duplexes.

**“Seasonally Adjusted at Annual Rate”** is the result of adjusting monthly or quarterly statistics to provide an indication of the annual total which would be achieved if activity in all other months or quarters were at the same level of performance relative to past seasonal patterns.

**Les transformations ou les modifications** effectuées dans un bâtiment existant sont exclues des relevés, ainsi que **les habitations saisonnières** (chalets d'été, de chasse, de ski, roulottes, maisons flottantes) et **les logements de type foyer** (hôpitaux, centres d'hébergement, institutions pénitentiaires, couvents, monastères, camp militaires et industriels et autres habitations collectives comme les hôtels, les clubs et les maisons de pension).

Les **maisons mobiles** sont incluses dans les relevés. Une maison mobile est un type de logement entièrement assemblé à l'usine, puis installé sur des fondations permanentes avant l'occupation.

Les **roulottes** ou tout autre type de logement déménageable, sans fondations permanentes, sont exclus des relevés.

Le terme **“logement”** désigne tout local d'habitation distinct et complet, muni d'une entrée privée donnant directement sur l'extérieur ou dans un vestibule, un corridor ou un escalier communs à l'intérieur de l'immeuble. On doit pouvoir utiliser cette entrée sans traverser un autre logement.

**Les types de logements utilisés dans les relevés sont définis de la même manière que pour le recensement.**

Une **“maison individuelle”** est un bâtiment comprenant un seul logement, complètement séparé, sur tous ses côtés, de toute autre habitation ou construction.

**“Maison jumelée”** désigne l'un ou l'autre des deux logements situés côte à côte dans un bâtiment contigu à aucune autre construction, et séparés l'un de l'autre par un mur commun ou mitoyen du sol jusqu'au toit.

Une **“maison en bande”** est un logement avec entrée privée joint à au moins deux habitations semblables, de manière à former une bande ou rangée de trois logements contigus ou plus.

La catégorie **“appartement et autre”** englobe tous les logements qui n'entrent pas dans les catégories ci-dessus, y compris les constructions communément appelées duplex, triples, duplex jumelés et duplex en bande.

Les **“données désaisonnalisées annualisées”** ou **“taux annuels désaisonnalisés”** sont le résultat d'une correction des statistiques mensuelles ou trimestrielles faite pour indiquer le total annuel qui serait atteint, compte tenu des caractéristiques saisonnières antérieures, si l'activité était la même au cours des autres mois ou trimestres.

**Definitions of Census Areas referred to in this Publication are as follows:**

1996 Census - A **Census Metropolitan Area (CMA)** is the main labour market area of an urbanized core or a continuous built-up area having 100,000 or more population. Census Metropolitan Areas contain whole municipalities or Census Subdivisions.

It comprises:

1. Municipalities completely or partly inside the continuous built-up area, and
2. other municipalities, if
  - (a) at least 50% of the employed labour force living in the municipality works in the urbanized core, or
  - (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

1996 Census - **Census Agglomerations (CA)** are defined in the same manner as CMA's except that the urbanized core population is between 10,000 and 99,999.

**Voici la définition des unités géostatistiques de recensement utilisées dans la présente publication.**

**Région métropolitaine de recensement (RMR)** - recensement de 1996: principal marché du travail d'un noyau urbanisé ou d'une zone bâtie en continu comptant 100 000 âmes ou plus. La RMR englobe des municipalités ou des subdivisions de recensement entières.

Elle se compose:

1. des municipalités qui se trouvent en totalité ou en partie à l'intérieur de la zone bâtie en continu et
2. d'autres municipalités pourvu qu'elles remplissent une des conditions suivantes:
  - (a) au moins 50% de la population active occupée vivant dans la municipalité travaille dans le noyau urbanisé, ou
  - (b) au moins 25% de la population active occupée qui travaille dans la municipalité habite le noyau urbanisé.

**Agglomération de recensement (AR)** - recensement de 1996: a la même définition que la RMR sauf que la population de son noyau urbanisé se situe entre 10 000 et 99 999 habitants.

## HOUSING STARTS DOWN IN MAY

The seasonally adjusted annual rate\* of housing starts in Canada fell 4.3 per cent in May to 155,000 units compared with 162,000 units in April.

Urban multiple starts were down 4.4 per cent to an annual rate of 62,600 units compared with 65,500 in April. The Atlantic and Prairie regions were the two areas reporting a decrease.

Urban single starts fell 5.5 per cent to an annual rate of 70,200 from 74,300 units the previous month. Quebec, Ontario and British Columbia had fewer single starts.

## BAISSE DES MISES EN CHANTIER EN MAI

Il y a eu 155 000 nouvelles mises en chantier en mai au pays, en données désaisonnalisées annualisées (DDA)\*, contre 162 000 le mois précédent, ce qui représente une baisse de 4,3 %.

Par ailleurs, la construction de logements collectifs en milieu urbain a fléchi de 4,4 %, avec 62 600 mises en chantier DDA en mai, comparativement à 65 500 en avril. Les provinces de l'Atlantique et des Prairies sont les seules ayant rapporté des baisses d'activité dans ce secteur.

En outre, la construction de maisons individuelles dans les centres urbains a aussi ralenti, passant de 74 300 mises en chantier DDA en avril à 70 200 le mois dernier, soit un recul de 5,5 %. Le Québec, l'Ontario et la Colombie-Britannique ont aussi enregistré une diminution des mises en chantier de logements individuels durant cette période.

\* DDA : Données mensuelles corrigées des variations saisonnières normales et exprimées sur une échelle annuelle en les multipliant par 12.

(1) Because of the small number of units involved, certain markets are not shown individually but are included in the totals.

(2) Data refers to Homeownership and Condominium dwelling units.

(1) Lorsque le nombre de logement est trop petit, les chiffres ne sont pas indiqués individuellement pour les marchés concernés mais englobés dans le total.

(2) Les données concernent les logements de propriétaires-occupants et en copropriété.

(1) Because of the small number of units involved, certain markets are not shown individually but are included in the totals.

(2) Data refers to Homeownership and Condominium dwelling units.

(1) Lorsque le nombre de logement est trop petit, les chiffres ne sont pas indiqués individuellement pour les marchés concernés mais englobés dans le total.

(2) Les données concernent les logements de propriétaires-occupants et en copropriété.

## Introduction

The statistics contained in this publication are the results of three National Surveys conducted by Canada Mortgage and Housing Corporation.

## Survey Coverage

The Starts and Completions Survey is carried out monthly in urban areas with populations in excess of 10,000 as defined by the 1996 Census. Centres with populations below 10,000 are enumerated on a sample basis four times a year, at the end of March, June, September and December.

The Market Absorption Survey is carried out in conjunction with the Starts and Completions Survey in urban areas with populations in excess of 50,000. When a structure is recorded as completed, a report is also made as to whether or not a unit has been sold or rented. The dwellings are then enumerated each month until such time as absorption occurs.

The Rental Market Survey is carried out on an annual basis in October in urban areas with populations in excess of 10,000 in row and apartment structures containing at least three rental dwelling units.

## Concepts and Definitions

A **“start”** for the purposes of the Starts and Completions Survey, is defined as the beginning of construction work on a building, usually when the concrete has been poured for the whole of the footing around the structure, or an equivalent stage where a basement will not be part of the structure.

A **“completion”** is defined as the stage at which all proposed construction work on a building has been performed, although under some circumstances a building may be counted as completed where up to 10 percent of the proposed work remains to be done.

For multiple-dwelling structures, the definition of a Start or a Completion applies to the structure rather than to the individual dwelling units therein.

The number of units **“under construction”** as at the end of the period shown, takes into account certain adjustments which are necessary for various reasons. For example, after a start on a dwelling has commenced construction may cease, or a structure when completed may contain more or fewer dwelling units than were reported at start.

**Only new self-contained dwelling units are enumerated in the Starts and Completions Survey**, such units being designed for non-transient and year-round occupancy.

## Introduction

Les statistiques contenues dans la présente publication proviennent de trois relevés d'envergure nationale faits par la Société canadienne d'hypothèques et de logement.

## Étendue des enquêtes

Le relevé des mises en chantier et des achèvements est fait mensuellement dans les centres urbains de 10 000 habitants et plus, déterminés par le recensement de 1996. Dans les collectivités de moins de 10 000 âmes, le relevé est fait par échantillonnage quatre fois l'an, soit à la fin des mois de mars, juin, septembre et décembre.

Le relevé des logements écoulés sur le marché est fait en même temps que le précédent dans les centres urbains de 50 000 habitants et plus. Lorsqu'on signale l'achèvement d'un immeuble, on indique aussi les logements vendus ou loués. L'immeuble est, par la suite, recensé chaque mois jusqu'à ce que tous ses logements soient écoulés sur le marché.

L'enquête sur les logements locatifs a lieu une fois par an, en octobre, dans les centres urbains de 10 000 habitants et plus; elle porte sur les ensembles de logements en bande et les immeubles d'appartements comprenant au moins 3 logements locatifs.

## Définitions

Dans le relevé des mises en chantier et des achèvements, **“mise en chantier” (ou logement mis en chantier)** désigne le début des travaux de construction, d'ordinaire après la mise en place de la semelle en béton, ou à un stade équivalent lorsque le bâtiment n'a pas de sous-sol.

**“Achèvement” (ou logement achevé)** désigne le stade où tous les travaux de construction sont terminés; dans certaines circonstances, on peut considérer un bâtiment comme achevé s'il ne reste que 10 p. 100 des travaux prévus à exécuter.

Pour les logements collectifs, la définition de mise en chantier ou d'achèvement s'applique à l'immeuble tout entier plutôt qu'aux logements individuels qu'il contient.

Le nombre des logements **“en construction”** à la fin d'une période comporte certains redressements rendus nécessaires pour diverses raisons. Par exemple, après la mise en chantier d'un logement, la construction peut cesser, ou un bâtiment peut contenir à l'achèvement plus ou moins de logements que le nombre signalé au moment de la mise en chantier.

**Seuls les logements autonomes sont dénombrés dans le relevé des mises en chantier et des achèvements**, qui ne porte que sur les logements neufs destinés à l'occupation permanente.

**Conversions and/or alterations** within an existing structure are excluded from the surveys as are **seasonal dwellings**, such as: summer cottages, hunting and ski cabins, trailers and boat houses; and **hostel accommodation**, such as: hospitals, nursing homes, penal institutions, convents, monasteries, military and industrial camps, and collective types of accommodation such as: hotels, clubs, and lodging homes.

**Mobile Homes** are included in the surveys. A mobile home is a type of manufactured house that is completely assembled in a factory, then moved to a foundation before it is occupied.

**Trailers** or any other movable dwelling (the larger often referred to as a mobile home) with no permanent foundation are excluded from the surveys.

A **“dwelling unit”** is defined as a structurally separate set of living premises with a private entrance either outside the building or from a common hall, lobby, vestibule or stairway inside the building. The entrance must be one that can be used without passing through anyone else’s living quarters.

**The definitions of types of dwellings, used in the Surveys, are in accordance with those in the Census.**

A **“single-detached”** dwelling is a building containing only one dwelling unit, which is completely separated on all sides from any other dwelling or structure.

A **“semi-detached”** dwelling is one of two dwellings located side-by-side in a building, adjoining no other structure and separated by a common or party wall extending from ground to roof.

A **“row”** dwelling is a ground-oriented dwelling attached to two or more similar units so that the resulting row structure contains three or more units.

An **“apartment and other”** dwelling includes all dwellings other than those described above, including structures commonly referred to as duplexes, triplexes, double duplexes and row duplexes.

**“Seasonally Adjusted at Annual Rate”** is the result of adjusting monthly or quarterly statistics to provide an indication of the annual total which would be achieved if activity in all other months or quarters were at the same level of performance relative to past seasonal patterns.

**Les transformations ou les modifications** effectuées dans un bâtiment existant sont exclues des relevés, ainsi que **les habitations saisonnières** (chalets d'été, de chasse, de ski, roulottes, maisons flottantes) et **les logements de type foyer** (hôpitaux, centres d'hébergement, institutions pénitentiaires, couvents, monastères, camp militaires et industriels et autres habitations collectives comme les hôtels, les clubs et les maisons de pension).

Les **maisons mobiles** sont incluses dans les relevés. Une maison mobile est un type de logement entièrement assemblé à l'usine, puis installé sur des fondations permanentes avant l'occupation.

Les **roulottes** ou tout autre type de logement démenageable, sans fondations permanentes, sont exclus des relevés.

Le terme **“logement”** désigne tout local d'habitation distinct et complet, muni d'une entrée privée donnant directement sur l'extérieur ou dans un vestibule, un corridor ou un escalier communs à l'intérieur de l'immeuble. On doit pouvoir utiliser cette entrée sans traverser un autre logement.

**Les types de logements utilisés dans les relevés sont définis de la même manière que pour le recensement.**

Une **“maison individuelle”** est un bâtiment comprenant un seul logement, complètement séparé, sur tous ses côtés, de toute autre habitation ou construction.

**“Maison jumelée”** désigne l'un ou l'autre des deux logements situés côte à côte dans un bâtiment contigu à aucune autre construction, et séparés l'un de l'autre par un mur commun ou mitoyen du sol jusqu'au toit.

Une **“maison en bande”** est un logement avec entrée privée joint à au moins deux habitations semblables, de manière à former une bande ou rangée de trois logements contigus ou plus.

La catégorie **“appartement et autre”** englobe tous les logements qui n'entrent pas dans les catégories ci-dessus, y compris les constructions communément appelées duplex, triples, duplex jumelés et duplex en bande.

Les **“données désaisonnalisées annualisées”** ou **“taux annuels désaisonnalisés”** sont le résultat d'une correction des statistiques mensuelles ou trimestrielles faite pour indiquer le total annuel qui serait atteint, compte tenu des caractéristiques saisonnières antérieures, si l'activité était la même au cours des autres mois ou trimestres.

**Definitions of Census Areas referred to in this Publication are as follows:**

1996 Census - A **Census Metropolitan Area (CMA)** is the main labour market area of an urbanized core or a continuous built-up area having 100,000 or more population. Census Metropolitan Areas contain whole municipalities or Census Subdivisions.

It comprises:

1. Municipalities completely or partly inside the continuous built-up area, and
2. other municipalities, if
  - (a) at least 50% of the employed labour force living in the municipality works in the urbanized core, or
  - (b) at least 25% of the employed labour force working in the municipality lives in the urbanized core.

1996 Census - **Census Agglomerations (CA)** are defined in the same manner as CMA's except that the urbanized core population is between 10,000 and 99,999.

**Voici la définition des unités géostatistiques de recensement utilisées dans la présente publication.**

**Région métropolitaine de recensement (RMR)** - recensement de 1996: principal marché du travail d'un noyau urbanisé ou d'une zone bâtie en continu comptant 100 000 âmes ou plus. La RMR englobe des municipalités ou des subdivisions de recensement entières.

Elle se compose:

1. des municipalités qui se trouvent en totalité ou en partie à l'intérieur de la zone bâtie en continu et
2. d'autres municipalités pourvu qu'elles remplissent une des conditions suivantes:
  - (a) au moins 50% de la population active occupée vivant dans la municipalité travaille dans le noyau urbanisé, ou
  - (b) au moins 25% de la population active occupée qui travaille dans la municipalité habite le noyau urbanisé.

**Agglomération de recensement (AR)** - recensement de 1996: a la même définition que la RMR sauf que la population de son noyau urbanisé se situe entre 10 000 et 99 999 habitants.

## HOUSING STARTS UP IN JUNE

The seasonally adjusted annual rate\* of housing starts in Canada went up by 13.8 per cent in June to 175,300 units compared with 154,100 units in May.

Urban multiple starts rose 24.6 per cent to an annual rate of 78,000 units compared with 62,600 in May. Urban single starts increased 8.3 per cent to an annual rate of 76,000 from 70,200 units the previous month. All regions have posted gains in each type of dwellings this month except in the Atlantic where the urban single starts were down.

## HAUSSE DES MISES EN CHANTIER EN JUIN

Il y a eu 175 300 mises en chantier en juin au pays, en données désaisonnalisées annualisées (DDA)\*, contre 154 100 le mois précédent, ce qui représente une hausse de 13,8 %.

La construction de logements collectifs en milieu urbain a augmenté de 24,6 % en juin, avec 78 000 mises en chantier, contre 62 600 en mai, et celle de maisons individuelles a progressé de 8,3 %, avec 76 000 maisons commencées, comparativement à 70 200 le mois précédent. Toutes les régions du pays ont affiché des gains à la fois au niveau des logements individuels et collectifs, sauf la région de l'Atlantique qui a accusé une diminution des mises en chantier de maisons individuelles en milieu urbain.
